

Organizational, Direct Support, and General Support Maintenance
Repair Parts and Special Tools List
(Including Depot Maintenance Repair Parts and Special Tools)

AIR CONDITIONER, VERTICAL, COMPACT
TYPE 1, VERTICAL SIZE C, 18,000 BTU/HR, 208 VOLT, 3 PHASE,
50/60 HERTZ, KECO MODEL F18T-2 NSN 4120-00-168-1781

TM 5-4120-360-24P, 28 October 1979, is changed as follows:

1. Remove and insert pages as indicated below. New or changed text
is indicated by a vertical bar in the margin. An illustration change is
indicated by a miniature pointing hand.

Remove pages	Insert pages
17 and 18	17 and 18
21 and 22	21 and 22
39 and 40	39 and 40
51 and 52	51 and 52
55 through 58	55 through 58

2. Retain this sheet in front of manual for reference purposes.

Order of the Secretary of the Army:

JOHN A. WICKHAM, JR.
General, United States Army
Chief of Staff

ficial:

R. L. DILWORTH
Brigadier General, United States Army
The Adjutant General

DISTRIBUTION:

To be distributed in accordance with DA Form 12-25A, Organizational, Direct Support and General Support Maintenance requirements for Air Conditioner, Compact, 18,000 BTU, 208V, 50/60 HZ, 3PH (F18T2) (TM 5-4120-360 Series).

REPORTING OF ERRORS

You can help to improve this manual by calling attention to errors and by recommending improvements. Your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms) and/or DA Form 2028-2 (Recommended Changes to Equipment Technical Manuals), may be used. Copies of DA Form 2028-2 are attached in the back of the manual for your use. Please mail your recommended changes directly to Commander, U. S. Army Troop Support and Aviation Materiel Readiness Command, ATTN: DRSTS-MTPS, 4300 Goodfellow Blvd., St. Louis, MO 63120. A reply will be furnished directly to you.

**GENERAL SUPPORT MAINTENANCE
REPAIR PARTS AND SPECIAL TOOLS LIST
(INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS)**

Section I. INTRODUCTION

Scope.

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of organizational, direct support, and general support maintenance of the Air Conditioner.

ing in the listings, followed by a list alphabetic sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. This index is followed by a cross-reference list of reference designators to figure and item numbers.

General.

This Repair Parts and Special Tools List divided into the following sections:

a. *Section II. Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in ASN sequence.

b. *Section III. Special Tools List.* Not applicable.

c. *Section IV. National Stock Number and Part Number Index.* A list, in National identification number (NIN) sequence,

3. Explanation of Columns.

a. *Illustration.* This column is divided as follows:

(1) *Figure Number.* Indicates figure number of the illustration on which item is shown.

(2) *Item Number.* The number used to identify item called out in the illustration.

b. *Source, Maintenance, and Recyclability (SMR) Codes.*

(1) *Source Code.* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of items. Source codes are entered in the first and second positions of the Uniform Source Code format as follows:

<i>Code</i>	<i>Definition</i>
PA	—Item procured and stocked for

	tality dictates that a minimum quantity be available in the supply system.	
PC	—Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.	—Item to be manufactured at the depot maintenance level.
PD	—Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.	—Item to be assembled at organizational level.
PE	—Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.	—Item to be assembled at support maintenance level.
PF	—Support equipment which will not be stocked but which will be centrally procured on demand.	—Item to be assembled at support maintenance level.
PG	—Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.	—Item to be assembled at organizational level.
KD	—An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.	—Item is not procured or not available through requisition.
KF	—An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.	—Installation drawing, construction sheet, field service drawing, that is identified by the repair's part number.
KB	—Item included in both a depot overhaul/repair kit and a maintenance kit.	—A support item that is not procured. When required, item is procured through normal channels.
MO	—Item to be manufactured or fabricated at organizational level.	

NOTE: Cannibalization or salvaging may be used as a source of supply for items used as a source of supply for items coded above except those coded as aircraft support items as restricted in 700-42.

(2) Maintenance Code. Maintenance codes are assigned to indicate the type of maintenance authorized to USE a support item. The maintenance codes entered in the third and fourth positions of the Uniform SMR Code format are:

(a) The maintenance code in the third position will indicate:

ate one of the following levels:

Application/Explanation

- Crew or operator maintenance performed within organizational maintenance.
- Support item is removed, replaced, used at the organizational level.
- Support item is removed, replaced, used at the direct support level.
- Support item is removed, replaced, used at the general support level.
- Support items that are removed, replaced, used at depot, mobile depot, or specialized repair activity only.

The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes.

Application/Explanation

- The lowest maintenance level capable of complete repair of the support item is the organizational level.
- The lowest maintenance level capable of complete repair of the support item is the direct support level.
- The lowest maintenance level capable of complete repair of the support item is the general support level.
- The lowest maintenance level capable of complete repair of the support item is the depot level.
- Repair restricted to (enter applica-

authorized.

B — No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Recoverability Code. Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability

Codes

Definition

Z	— Nonreparable Item. When unserviceable, condemn and dispose at the level indicated in position 3.
O	— Reparable item. When uneconomically repairable, condemn and dispose at organizational level.
F	— Reparable item. When uneconomically repairable, condemn and dispose at the direct support level.
H	— Reparable item. When uneconomically repairable, condemn and dispose at the general support level.
D	— Reparable item. When beyond lower level repair capability return to depot. Condemnation and disposal not authorized below depot level.
L	— Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A	— Item requires special handling or condemnation procedure because of specific reasons (i.e., precious metal content, high dollar value, critical material, hazardous material). Refer to a

National stock number assigned to the item and which will be used for requisition-

d. **Part Number.** Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE: When a stock numbered item is repositioned, the item received may have a different part number than the part being replaced.

e. **Federal Supply Code for Manufacturer (FSCM).** The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or government agency, etc.

f. **Description.** Indicates the Federal item name and, if required, a minimum description to identify the item. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column. When one part to be used differs between serial numbers of the same model, the effective serial numbers are shown as the last line of the description. In the Special Tools List, the initial basis of issue (BOI) appears as the last line in the entry for each special tool, MDE, and support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased accordingly.

g. **Unit of Measure (U/M).** Indicates the standard of the basic quantity of the listed

by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit measure differs from the unit of issue, lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. **Quantity Incorporated In Unit.** Indicates the quantity of the item used in breakout shown on the illustration figure which is prepared for a functional group, subfunctional group, or an assembly. A zero appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g., shims, spacers, etc).

4. Special Information. (Use the following subparagraphs as applicable.)

a. Usable on codes are shown in the description column. Unorded items are applicable to all models.

b. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 5-4120-360-14. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual.

c. Detailed assembly instructions for items source coded to be assembled are found in TM 5-4120-360-14. Assembly components are listed immediately following the item to be assembled.

d. Repair parts kits and gasket sets appear as the last entries in the repair lists for the figure in which the parts are listed as repair parts.

e. The following publications pertain to Model F18T-2 and its components:

How to Locate Repair Parts.

a. When National Stock Number or Part Number Is Unknown:

(1) First. Using the table of contents, determine the (Insert as applicable-functional group or subgroup) within which the item belongs. This is necessary since illustrations are prepared for (insert as applicable — functional groups or subgroups), and listings are divided into the same groups.

(2) Second. Find the illustration covering the (Insert as applicable — functional group or subgroup) to which the item belongs.

(3) Third. Identify the item on the illustration and note the illustration figure and item number of the item.

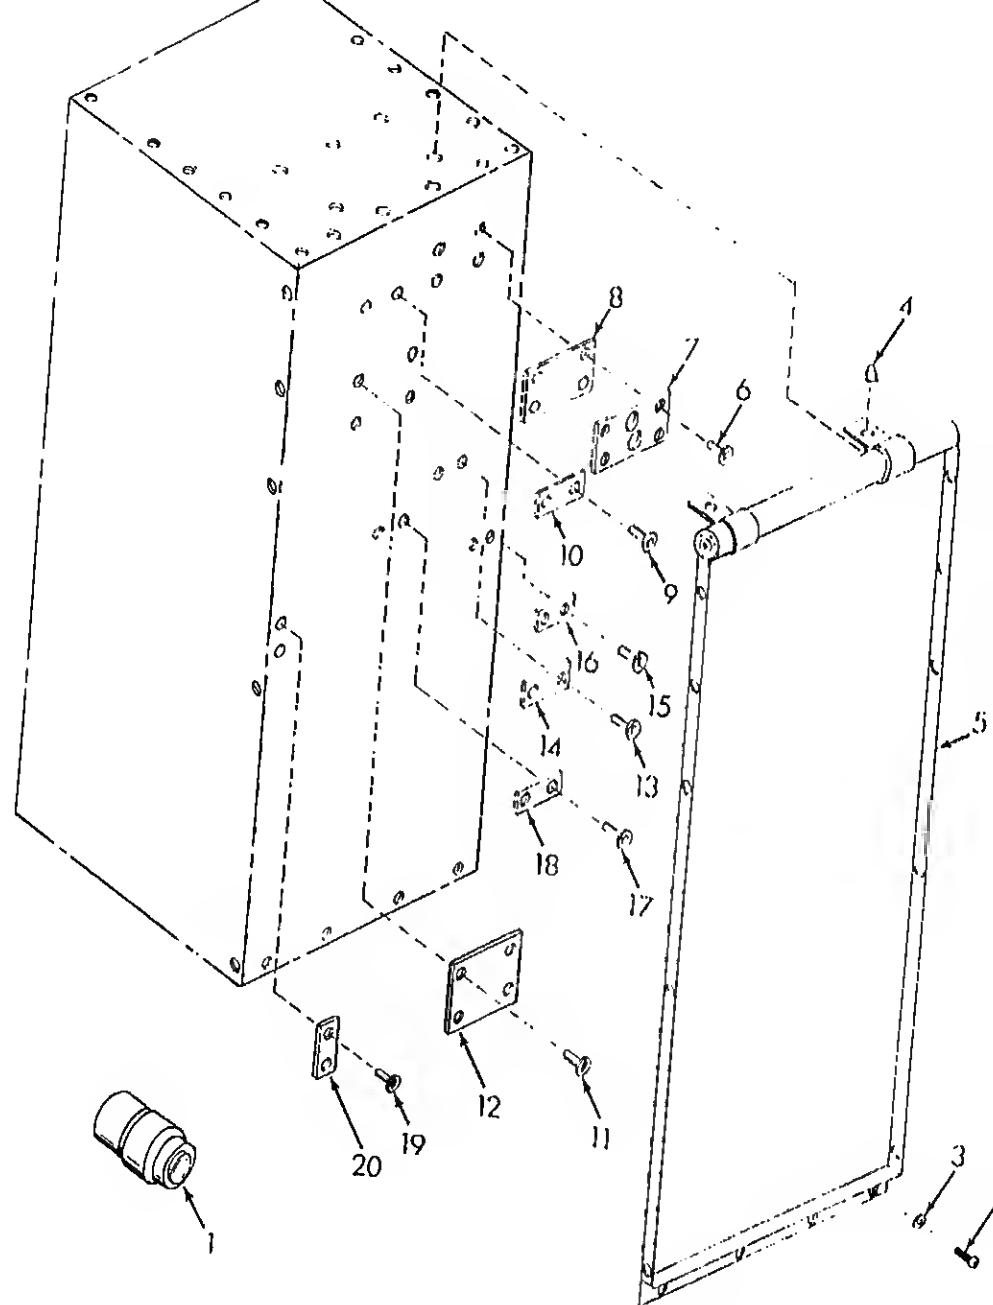

(4) Fourth. Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number Is Known:

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NIIN sequence followed by a list of part numbers in alphabetic sequence, cross-referenced to the illustration figure number and item number.

2-1
a

In line 6 of paragraph 2-1a manual states the engine has cylinders. The engine on my only has 4 cylinders. Change the manual to show 4 cylinders.

31

4-3

Callout 16 on figure 4-3 is pointing at a bolt. In the key to fig. 4-3, item 16 is called a slim. Please correct one or other.

25

line 20

I ordered a gasket, item 19 on figure B-16 by NSN 2910-00-762-3100. I got a gasket but it doesn't supply says I got what I ordered so the NSN is wrong. Please give me a good NSN.

The Metric System and Equivalents

Linear Measure

er = 10 millimeters = .39 inch
 er = 10 centimeters = 3.94 inches
 10 decimeters = 39.37 inches
 er = 10 meters = 32.8 feet
 er = 10 dekameters = 328.08 feet
 er = 10 hectometers = 3,280.8 feet

Weights

n = 10 milligrams = .15 grain
 n = 10 centigrams = 1.54 grains
 0 decigrams = .035 ounce
 1 = 10 grains = .35 ounce
 n = 10 dekagrams = 3.52 ounces
 n = 10 hectograms = 2.2 pounds
 n = 100 kilograms = 220.46 pounds
 n = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 38.82 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Source Measure

1 sq. centimeter = 100 sq. millimeters = .156 sq. inch
1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
1 sq. meter (centaro) = 100 sq. decimeters = 10.76 sq. feet
1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
1 sq. hectometer (hectaro) = 100 sq. dekameters = 2.47 a.
1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors

To	Multiply by	To change	To	Mul
centimeters	2.540	ounce-inches	newton-meters	,0
meters	.306	centimeters	inches	
meters	.914	meters	feet	
kilometers	1.009	meters	yards	
square centimeters	6.451	kilometers	miles	
square meters	.093	square centimeters	square inches	
square meters	.830	square meters	square feet	
square kilometers	2.590	square meters	square yards	
square hectometers	.405	square kilometers	square miles	
cubic meters	.026	square hectometers	acres	
cubic meters	.765	cubic meters	cubic feet	
milliliters	29.573	cubic meters	cubic yards	
liters	.473	milliliters	fluid ounces	
liters	.946	liters	pints	
liters	3.765	liters	quarts	
grams	26.349	liters	gallons	
kilograms	.454	grams	ounces	
metric tons	.907	kilograms	pounds	
newton-meters	1.865	metric tons	short tons	
newton-meters	.11375
